Aircraft Maintenance Planning And Scheduling

Originality/value - Existing approaches to aircraft maintenance planning and scheduling are limited in their capacity to deal with contingencies arising out of inspections carried out during the...

(PDF) Aircraft maintenance planning and scheduling: An ...

Existing approaches to aircraft maintenance planning and scheduling are limited in their capacity to deal with contingencies arising out of inspections carried out during the execution phase of large maintenance projects.

Aircraft maintenance planning and scheduling: an ...

Purpose - The purpose of this paper is to examine how certain limitations of the current approaches to planning and scheduling of aircraft heavy maintenance can be addressed using a single integrated framework supported by unified data structures.Design/methodology/approach - The "unitary structuring technique", originally developed within the context of manufacturing planning and control, is further enhanced for aircraft heavy maintenance applications, taking into account the uncertainty...

[PDF] Aircraft maintenance planning and scheduling: an ...

Abstract The aircraft maintenance scheduling is one among the major decisions an airline has to make during its operation. Though maintenance scheduling comes as an end stage in an airline operation, it has potential for cost savings. Maintenance scheduling is an easily understood but difficult to solve problem.

An optimization model for aircraft maintenance scheduling ...

The Aircraft Maintenance Process is a major cost centre within the aircraft operating environment and provides also a significant opportunity to deliver optimization and saving. This course looks at several advanced subjects which are directly involved in the delivery of effective Aircraft Maintenance Planning.

Online Courses - Aviation Regulatory Experts

Planners are organized into a separate department from the craft maintenance crews. This facilitates specialization in planning and scheduling techniques as well as focus on future work. • Planners should not be members of the craft crew for which they plan.

6 Essential Maintenance Planning Principles | Prometheus Group

The Maintenance Management Production specialist plans, schedules and organizes use and maintenance of aircraft, engines, munitions, missiles, space systems, aerospace ground equipment (AGE), and associated support systems. They document and maintain aircraft, engines, missiles, munitions, AGE, and associated support systems records.

Consideration of Preventive Maintenance, Predictive Maintenance, and Project Work 313 Preventive Maintenance and Planning 313 Predictive Maintenance and Planning 319 Project Work and Planning 320 x Contents

Maintenance Planning and Scheduling

Maintenance Planning and Scheduling is a key component in delivering maintenance services effectively and efficiently. After leaving the maintenance manager roll in an industrial process chemical manufacturer in 2005 I started presenting maintenance planning and scheduling training courses around Australia and Asia.

Maintenance Planning and Scheduling Workbook

Most organisations that implement maintenance planning and scheduling do not achieve the long-term results they expected. Often the improvements don't last, even when the initial implementation seemed successful. But, it doesn't have to be like that. This article outlines a structured, proven approach that has worked in many organisations.

How To Implement Maintenance Planning & Scheduling

Aircraft maintenance planning and scheduling constitute planning, control and execution of materials (spare parts), operations (inspection, disassembly and assembly activities) and resources...

(PDF) Current Practices and Problem Areas in Aircraft ...

to planning and scheduling of aircraft heavy maintenance can be addressed using a single integrated framework supported by unified data structures.
