Atlas Of Ultrasound Guided Regional

Ultrasound is an important imaging modality for the detection and characterization of breast cancer, but it has been noted to have high false-positive rates. Here, the authors present an ...

Artificial intelligence system reduces false-positive ...

When a lesion has the typical features of a fibroadenoma on ultrasound and there are no clinical red flags they can be safely followed clinically. When lesions enlarge or have atypical imaging findings, ultrasound-guided core biopsy is a minimally invasive outpatient procedure that will give a diagnosis with virtually no complications.

Fibroadenoma (breast) | Radiology Reference Article ...

With good quality ultrasound and enough effort, it is possible in everyday practice to identify the DCIS process as it grows in the ductal system of the breast. It is quite possible to identify those minute wild and crazy calcifications of DCIS in the ducts itself and ultrasound-guided biopsy of DCIS is now an everyday procedure.
