See our thematic page on COVID-19 and migration data for more data on the impact of COVID-19 on remittances.. In April 2020, Ratha et al. projected a decline in remittance flows to low and middle-income countries (LMICs) by about 20 per cent because of the economic crisis caused by the COVID-19 pandemic which negatively affected wages and employment for migrant workers.

Notification rates for suspected foodborne diseases have increased over recent decades. This is partly due to better identification and reporting systems but changes in consumer behaviour are believed to have also played a role. More foods are prepared outside the home, which may carry higher risks if poorly prepared (Hall et al. 2002).
