Driver Drowsiness Detection System - About the Intermediate Python Project. In this Python project, we will be using OpenCV for gathering the images from webcam and feed them into a Deep Learning model which will classify whether the person's eyes are 'Open' or 'Closed'. The approach we will be using for this Python project is as ...

Intermediate Python Project - Driver Drowsiness Detection ...

Intermediate Python takes students past the basic fundamentals and gets into more complex and challenging programming tasks. This can include a range of things from building modules from the bottom up, to constructing and using custom classes. Intermediate Python enhances programming skills beyond those of the introductory training course.
