A GPU instance is recommended for most deep learning purposes. Training new models will be faster on a GPU instance than a CPU instance. You can scale sub-linearly when you have multi-GPU instances or if you use distributed training across many instances with GPUs. To set up distributed training, see

Recommended GPU Instances - Deep Learning AMI

Amazon Web Services (AWS) is the third most important revenue stream, contributing 12.5% to the overall mix. However, despite contributing a relatively small percentage to total revenue in 2019, AWS made up a large portion of Amazon's operating income, making it the key to the company's overall profitability.
