Archaeology is the study of people in the past, their activities and actions, cultural practices, tools and technological development, and in some cases (where possible) their superstitious and religious practices, expression of their cultural identity and other beliefs about themselves or the world around them.

### Archaeology: Examining Its Past and the Future ...

Mechanisms of selection for domestication traits in cereals and other annual plants are commonly explained from agro-technological and genetic perspectives. Since archaeobotanical data showed that domestication processes were slow and protracted, research focused on genetic constraints and hypothetical &lsquo;non-selective&rsquo; management regimes to explain the low selection rates. I argue ...

Sociology has been vital in reconstructing our attitude towards fellow human beings. The discipline of sociology studies numerous societies, their cultures, traditions and behaviors; and it is this very nature of the discipline that helps human beings create a clearer understanding and acceptance of each other's differences.

### 10 Reasons Why It's Important to Study Sociology and Scope

The environment of New Zealand is characterised by an endemic flora and fauna which has evolved in near isolation from the rest of the world. The main islands of New Zealand span two biomes, temperate and subtropical, complicated by large mountainous areas above the tree line. There are also numerous smaller islands which extend into the subantarctic. The prevailing weather systems bring ...
