An autostereogram is a single-image stereogram (SIS), designed to create the visual illusion of a three-dimensional (3D) scene from a two-dimensional image. In order to perceive 3D shapes in these autostereograms, one must overcome the normally automatic coordination between accommodation (focus) and horizontal vergence (angle of one's eyes).

## **How Do Magic Eye Pictures Work? | Mental Floss**

A stereogram is a picture within a picture. The creators have cleverly hidden a 3D object inside an unusual looking 2D picture. But the brain can only create the illusion of depth when you learn how to view the stereogram correctly. For information on how to see the effect, please visit the Wikipedia article on Autostereograms.
