Symptoms. Patent ductus arteriosus symptoms vary with the size of the defect and whether the baby is full term or premature. A small PDA might cause no signs or symptoms and go undetected for some time — even until adulthood. A large PDA can cause signs of heart failure soon after birth.. Your baby's doctor might first suspect a heart defect during a regular checkup after hearing a heart ...

Human behavior plays a central role in the maintenance of health, and the prevention of disease. With an eye to lowering the substantial morbidity and mortality associated with health-related behavior, health professionals have turned to models of behavior change to guide the development of strategies that foster self-protective action, reduce behaviors that increase health risk, and ...
