Assessing, diagnosing & treating: Child ADHD, adult ADHD, learning disabilities, autism spectrum, genetic disorders, neurological disorders, mood and behavioural disorders. Comprehensive Assessment. Testing can be conducted in all the 10 domains below to form a comprehensive assessment:

Sydney Cognitive Development Centre | Maximising Cognitive ...

Social communication disorder (SCD) is similar to autism spectrum disorder. The main difference is that children diagnosed with SCD don't have restricted, repetitive and/or sensory behaviour. If children have at least two restricted, repetitive and/or sensory behaviours, it could point to a diagnosis of autism spectrum disorder.

DSM-5 and autism diagnosis | Raising Children Network

I teach parents and practitioners that children with ADHD, anxiety, autism, and other needs can improve and heal, and that there's hope for your children. Then I educate and empower you to make strategic personalized nutrition and dietary changes

that positively affect children's bodies, which in turn helps their focus, mood, and behavior.
