Read Book Underwater Acoustic System

The Underwater Acoustic Signature Analysis System (UASA) is an Acoustic Intelligence (ACINT) system that may be located on land or at sea. The UASA performs Low Frequency (LOFAR) Sonar data collection, processing, analysis, classification and database management.

Read Book

Underwater Acoustic System signature analysis

The water-column cross-section enables users to visualise the underwater environment and provides quantitative analysis on sound channels, frequency and Convergence Zone (CZ) probability. In the analysis screen, operators can upload custom reverberation loss data and review model results.
