For example, let's say a lottery required 6 picks of numbers between 1 and 40. This would yield 3,838,380 possible number combinations (calculator here). Now, let's say that same lottery had a \$10m jackpot. In theory, Mandel could buy a ticket for every single combination at \$1 each and be guaranteed a win — and, after taxes, a decent profit.

The man who won the lottery 14 times

One of the most improbable things in life is to win a lottery, especially, those with huge cash prizes. The odds of winning a jackpot in some lottery games are one in hundreds of millions. Despite extremely low odds, many Americans gamble in hopes of securing a happy life, free...
