Dyslexia, also known as reading disorder, is a disorder characterized by difficulty reading in individuals with otherwise unaffected intelligence. Different people are affected to different degrees. Problems may include difficulties in spelling words, reading quickly, writing words, "sounding out" words in the head, pronouncing words when reading aloud and understanding what one reads.

Dyslexia - Wikipedia

In an anatomic study (Tubbs, Tyler-Kabara, et al., 2005a) we found that the dorsal scapular nerve pierced the middle scalene muscle at a mean distance of 3 cm (range 1.8-4.5 cm) from its origin from the cervical spine and was more or less centrally located at this exit site. The dorsal scapular nerve was found to lie a mean distance of 1.5 cm (range 1-3.2 cm) medial to the vertebral border of

Clinical notes Muscle testing. It is incredibly important to properly test the function of the deltoid muscle to accurately determine muscular or nervous injury. An inability to abduct the arm from a position in which the arm is resting at the side of the body does not indicate an injury to the deltoid muscle or the axillary nerve.
