Lodestijn et al. employ marker-free lineage tracing in pancreatic cancer xenograft models to demonstrate that clonogenic capacity of tumor cells is fully defined by the microenvironment and not by tumor-cell-intrinsic features. Consequently, targeting the stroma using Hedgehog inhibition alters clonal dynamics but does not limit tumor growth.

Marker-free lineage tracing reveals an ... - cell.com

Increased lifespan was also associated with a variety of physiological benefits including improved mitochondrial function and preservation of stem cell function (Zhang et al., 2016). Though NMN or other NAD + boosters have not yet been tested for their effects on murine lifespan, some mice have been dosed for long periods. For example, starting ...
