Definition. The Taylor series of a real or complex-valued function  $f(x)$  that is infinitely differentiable at a real or complex number  $a$  is the power series  $f(a) + f'(a)(x-a) + \frac{f''(a)}{2!}(x-a)^2 + \frac{f'''(a)}{3!}(x-a)^3 + \dots$ , where  $n!$  denotes the factorial of  $n$ . In the more compact sigma notation, this can be written as  $\sum_{n=0}^{\infty} \frac{f^{(n)}(a)}{n!} (x-a)^n$ .

# Download Free Free Thomas Finney Calculus 7th Edition

$f^{(n)}(a)$ , where  $f^{(n)}(a)$  denotes the  $n$ th derivative of  $f$  evaluated at the point  $a$ .

This result should be compared with Section 2.2, Eq. (9), the radial electric field intensity of a point charge in free space,  $E = \frac{Q}{4\pi\epsilon_0 r^2} \mathbf{a}_r$ . In free space, therefore,  $D = \epsilon_0 E$  (free space only) (2). Although (2) is applicable only to a vacuum, it is not restricted solely to the field of a point charge.
