Welcome to my page of solutions to "Introduction to Algorithms" by Cormen, Leiserson, Rivest, and Stein. It was typeset using the LaTeX language, with most diagrams done using Tikz. It is nearly complete (and over 500 pages total!!), there were a few problems that proved some combination of more difficult and less interesting on the

The new C++11 atomic library standard throws another wrench into the works, challenging the way many of us express lock-free algorithms. In this post, I'd like to re-introduce lock-free programming, first by defining it, then by distilling most of the information down to a few key concepts.
