Action Industries. Boot Pneumatic 55 Edge

A pneumatic sensing edge is a pressurized air chamber (the gum hose) which fits inside the existing bottom seal of your door. When the pressurized chamber makes contact with an obstruction, the displaced air is sent to the air switch which is connected to the operator. The air switch then sends a signal through coil cord to the operator.

Garage Door Opener Pneumatic Reversing Safety Edge Kit ...

Other LiftMaster safety edges include pneumatic tubes, which can be cut to match the dimensions of a garage or gated drive. LiftMaster even carries infrared safety edge receivers and transmitters for a less noticeable, but still effective, way of providing safety and security to your gates and drives.

LiftMaster Commercial Safety Edges and Sensors

Pneumatic 005 A pneumatic reversing edge is an entrapment protection system, which will trigger an air switch to reverse or stop the door when it encounters an obstruction. Not recommended for doors over 22 feet wide. Note:Some of these items are not stocked in all our distribution centers, please call us to confirm availability.

Safety Accessories Pneumatic Reversing Edges

Integrated EPDM 16mm x 15mm Angle Safety Contact Edge These pressure-sensitive safety contact edges are designed for use on edges of guards and gates at possible crushing or shearing points. The safety edges signal the power source to shut down when tripped.

MillerEdge :: End Users :: Door Safety

As an added feature, the sensing edge provides a secure, weather-tight seal and conforms to the floor surface. Sensing edges allow for added safety and peace of mind. The Bottom Sensing Edge is available for the following commercial door operators: RHX ® , RSX ® and RMX ®

Commercial Door Bottom Sensing Edges

Safety Edge - 15 x 25mm Profile Safety contact edges detect presence at possible danger points of closing edges. Used in conjunction with safety relays, the safety function is triggered when a person or object contacts the edge. These models offer a 15 x 25mm profile and require end caps; an aluminum mounting rail is included.

Safety Edges | AutomationDirect

Safety Edges are "contact" devices that operate when touched using pressure sensitive sensors. If an obstacle is encountered, the device signals the gate opener to stop and/or reverse operations. These devices are sold by the foot with 4', 5', and 6' versions typically carried in stock.

Safety Edges & Sensing Devices, Sensing Edge, Treadle ...

What is a Sensing Edge? A Sensing Edge is a touch sensitive switch that sends a signal to start, stop or reverse a motor or even to ring a bell. Since they typically operate on 24 volts, the possibilities for applications are endless. Where can Sensing Edges be used? Anywhere that you want a simple touch to send a signal! Common applications ...
