To create a measurement manual, we start with SOX-compliant SOP templates that address the most common procedures. Then, GCI adapts the templates to your company's operations or procedures. Each portion of the manual will identify the recommended standard (AGA, API, or GPA), allowing users to refer to the appropriate documents.

GCI: Reliable Standard Operating Procedures (SOPs)

4.2 There are inherent limitations when performing any type of sampling, any one of which may affect the representative nature of the sample. As examples, a spot sample provides a sample from only one particular point in the tank, vessel compartment, or pipeline. In the case of running or all-level samples, the sample only represents the column of material from which it was taken.
