This Soils and Plant Nutrients Chapter from the Extension Gardener Handbook examines the physical and chemical properties of soil as well as the important role organic matter plays. The chapter discusses how to submit a soil sample for testing and how to read the report to apply necessary fertilizers.

1. Soils and Plant Nutrients | NC State Extension Publications

Soils in the narrow margins of these barren playas are generally saline, depending on climate and drainage, and are sparsely vegetated with salt-tolerant plants. Marine deposits settled out of the sea, lagoons, or estuaries and commonly were reworked by currents and tides. Subaqueous soils include sediments that remain under water.

France | History, Map, Flag, Capital, & Facts | Britannica

France is among the globe's oldest nations, the product of an alliance of duchies and principalities under a single ruler in the Middle Ages.Today, as in that era, central authority is vested in the state, even though a measure of autonomy has been granted to the country's régions in recent decades. The French people look to the state as the primary guardian of liberty, and the state in ...

Control Groups and Treatment Groups | Uses & Examples

Control groups in scientific research. Published on July 3, 2020 by Lauren Thomas. Revised on April 19, 2021. In a scientific study, a control group is used to establish a cause-and-effect relationship by isolating the effect of an independent variable.. Researchers change the independent variable in the treatment group and keep it constant in the control group.

An introduction to quasi-experimental designs. Published on July 31, 2020 by Lauren Thomas. Revised on October 20, 2021. Like a true experiment, a quasi-experimental design aims to establish a cause-and-effect relationship between an independent and dependent variable.. However, unlike a true experiment, a quasi-experiment does not rely on random assignment.

Loess (US: / ˈ l ɛ s , ˈ l oʊ ə s , ˈ l ɑ s /, UK: / ˈ l ɜː s /; from German: Löss) is a clastic, predominantly silt-sized sediment that is formed by the accumulation of wind-blown dust. Ten percent of Earth's land area is covered by loess or similar deposits.. Loess is an aeolian (windborne) sediment, defined as an accumulation of 20% or less of clay and a balance of roughly equal ...
